

Fan

LSFG/MSFG 146 – 250 – LSX/MSX ATEX versions

GEOVENT centrifugal fan LSFG and MSFG with forward curving impeller is used for extraction within the industry or for comfort ventilation, depending on the variant. The fan is made of 100% galvanized steel for optimum corrosion resistance and therefore, it is suitable for outdoor installation on the roof or on the wall. There is a complete program of accessories, and the fan can be delivered with a number of options, such as flex connection, mountings, rainshield, motor protection, pressure monitor and soundproof box. As standard we supply supporting angels with vibration absorbers, inlet nozzle with net and clamp for mounting the outlet flange. The fan is also supplied in ATEX version according to the 2014/34/EU directive. Then the type is called LSX/MSX, and it is supplied as standard with EExE motor. Other variants are offered on inquiry.

On inquiry it is possible to deliver the fan with built-in frequency converter, two-speed motor, with 6- or 8-poled motors, motors with special voltage or higher efficiency, special high temperature version a.s.o.

Air volume up to: 4.900 m³/h
Pressure up to: 1.840 Pa

Technical data / Other data / Features

Motor: Directly driven by a B5-

Flange motor. Sealing class IP-55
Voltage: 3x400V or 1x230V / 50 Hz

3 of the fans sides can be used as mounting flange.
Made of hot-galvanized plate. All screws and bolts are electro galvanized.

LSFG/MSFG fan

Testet iht. ISO 5801

Inclusive supporting angels with vibration absorbers, inlet nozzle with net and clamp for mounting the outlet flange.

Pressure drop - LSFG/LSX

The fans ampere usage is based on 3x400V motors. When 1x230V motors (Fan sizes 146-225) are used, is it possible to use a factor on about 2.7 to get the approximate ampere usage (can vary depending on model)

The air measurements are made without using an outlet flange on the outlet side and by a temperature on 20°C. The pressure lost measured in Pascal indicate the static pressure.

Pressure drop - MSFG/MSX

The fans ampere usage is based on 3x400V motors. When 1x230V motors (Fan sizes 146-200) are used, is it possible to use a factor on about 2.7 to get the approximate ampere usage (can vary depending on model).

The air measurements are made without using an outlet flange on the outlet side and by a temperature on 20°C. The pressure lost measured in Pascal indicate the static pressure.

Dimensions

Dimension table Fans LSFG/MSFG 146-250

Type	A	B	C	øD	E	F	G	H	I	J	K	L	M	N	O	Vægt
LSFG/MSFG 146	245	400	295	160	145	134	113	360	178	95	185	27	402	118	225	11 kg
LSFG/MSFG 180	300	400	350	160	168	165	135	360	178	120	225	27	527	138	280	12 kg
LSFG/MSFG 200	350	400	400	200	180	205	165	360	205	130	250	27	577	150	330	19 kg
LSFG/MSFG 225	370	500	450	250	195	210	190	460	219	145	280	27	597	165	380	28 kg
LSFG/MSFG 250	410	500	500	250	215	230	210	460	300	170	320	27	637	185	435	47 kg

NB: By LSX/MSX versions the motor will typically have a larger physical measure than standard versions, and therefore it will also have a higher net weigh.

Accessories

Soundproof box for reduction of the sound level.
The fan is enclosed in a closed wind- and waterproof galvanized box.
The sound is typically subdued to 8-15 dB(A)

Wall bracket, hot-galvanized, is supplied in two sizes,
For mounting the fan on wall
Must be used with supporting angels.

Galvanized rain shield for the fan.
Protects the motor from water intrusion

Outlet flange, hot-galvanized, is supplied in several
Different sizes. Is used as transition from the fan's square yield to a round channel.

MSFG 250	86	90	77	75	76	71	65	84	78

- A. Outlet flange, transition from the fan's square yield to a round channel. The outlet flange, which is a sleeve, has an EPDM rubber packing in sealing class C. By using vibration dampers a flexible connection between the outlet flange and the yield can be insert. .
- B. Clamp, galvanized, is used for attachment of the outlet flange with the aid of 6 pcs. M6 screws. After mounting you must use joint filler.
- C. Inlet in sleeve, galvanized, is provided with net to protect the fans impeller and EPDM rubber packing in sealing class c. By using vibration dampers a flexible connection between the inlet and the piping can be insert.
- D. Supporting angels, galvanized, is supplied with or without vibration dampers depending on the application. The vibration dampers are adjusted to each Fan.
- E. Roof bracket GB 15-45°, galvanized, is supplied with angel brackets on 200 x 1.000mm, so it is possible to saw off until you have the right pitch. The roof bracket is supplied with 4 pcs. Of mounting sheets with holes for the most common roofing tiles.
- F. Wall bracket, galvanized, is supplied as a complete set with screws for mounting the fan.

ATEX fan LSX/MSX

ATEX fan

ATEX
Compliant

Our series of atex fans with forward curving impeller are as standard supplied with EEx e motors, but can also be supplied with EEx d or EEx de motors.

The typical scope of application is zone 1, zone 2 and zone 22.

The construction is based on standard LSFG/MSFG, but has beside the ATEX motor, also protection against static and sparks in inlet.

For ATEX applications, where acid proof execution is needed, this can be offered. All plate parts, screws and bolts a.s.o. are supplied in rustproof ANSI 316L and are subsequently stained. The wheel is either supplied in a special lacquered edition or in ANSI 316L.
