

## Hose for ventilation

# GeoFlex Kevlar HT-300

GeoFlex Kevlar HT-300 is a high temperature hose designed for extraction or air supply of hot air, fumes, smoke or dust within the industry. Suitable for extraction of exhaust gasses from big combines or excavator etc., or extraction of air from a heater.

### Material

Silicone coated kevlar fabric

### Colour

Green

### Length

From 1 – 10 m

Special-length after request

### Temperature resistance

- 60°C til +260°C short + 300°C

### Application

Extraction of hot fumes, gasses or dust in all fields of industry

### Properties

Good temperature resistance

Flame retardant

Outer wear strip

Very light weight

GeoFlex Kevlar HT-300

### Technical specifications
